

## ***Perù***

### **General Aspects**

Perù is a Democratic Republic .

It covers a surface area of 51.000 sq. km, with a population of 4 millions people.

### **Diffusion of ICT**

PC penetration (number of PCs/population) is estimated 5,9%<sup>1</sup>. The country has 2 access to internet each 100 persons; approximately, the number of the users of telephone amounts to 6,6%; only 4,1% of people uses a mobile telephone.

### **Public Administration on-line**

Only 9% of governmental bodies of central PA has an institutional web site; the percentage is insubstantial when referred to local PA (0,1%).

Government's principal web sites generally include press release, speeches and statement of the Head of Government, official documents, government and legislative acts.

There is also a specific portal for citizens.

### **E-Government**

The efforts of the Peruvian Government regard, mostly, the shine attempt to involve citizens to the activities of the public institutions. The main on-line services concern, in facts, forums discussions, requests and suggestions via e-mail, public administration information.

Services to companies are limited to the availability of some basic economic information.

Peruvian government has started an action plan to promote the application of ICT.

One first goal has been the implementation of a single information portal to citizens.

The idea is to allow citizens to get information about state activities and use this information as a mechanism of control over public administration. Citizens are stimulated to participate by suggesting changes in the program or asking for other information to be included on the web page.
